BACHELOR'S DEGREE IN SYSTEMS ENGINEERING

Data Engineer with experience designing and deploying cloud architectures (Azure, AWS) and automating data workflows. Specialized in Python, SQL, container orchestration (Docker), and distributed processing (PySpark). Demonstrated experience building robust ETL/ELT pipelines and optimizing databases to drive operational efficiency and large-scale data analysis.

EDUCATION

2026 - Present
Universidad Nacional Mayor de San Marcos
Master's in Artificial Intelligence

2019 - 2023
Universidad Nacional Mayor de San Marcos
Systems Engineering - Top 20%

2022
Universidad de Guadalajara
Computer Engineering - Exchange Student

CERTIFICATIONS

2025
Data Engineering Zoomcamp (Terraform, Docker, dbt)
DataTalks.Club

2025
Azure Data Fundamentals
Microsoft

2023
Python for ETL
Data Mining Consulting

PROFESSIONAL EXPERIENCE

Management and Control Analyst | Data Engineering (ETL & SQL)

Interbank, July 2025 - Present

Data specialist experienced in transforming complex information into actionable insights. Proven track record as technical lead of the "La Gran Aventura" (LGA) program, managing ETL pipelines (SSIS) and optimizing databases (SQL Server, Teradata) with Python and SQL to drive the bank's performance and operational efficiency.

Cloud & Data Engineer

Edukusy, September 2021 - September 2024

Managed Linux environments and cloud data workflows, automating tasks with Python, Bash scripting, and PySpark. Implemented Azure Data Factory pipelines for batch data integration. Managed Azure SQL databases and container orchestration with Docker, optimizing performance in distributed architectures.

Server Administrator

Reporte Operatorio, September 2019 - March 2022

Developed and deployed a data-driven operational reporting platform using MySQL, PHP, and AWS services (EC2). Managed database optimization, process automation, and server administration in Linux environments via CLI.
